Visualization: Adjusted the color to 3-step and changed font color and size for a less cluttered look.
Analysis: This map of sales locations shows that California outperforms all states and that Texas, Illinois, and Florida follow behind but skips a color step in Sales, showing that CA is far above the next best in sales. It is clear that the company sells to a majority of the US, but there is room to expand into West Virginia, Delaware, Vermont, Maine, Wyoming.

Visualization: Improved visual aesthetics by adding blue concentration by quarter to easily see the increase in profit by color shade within each year. Hid the Order Date label as it was unnecessary and fit width for better visibility.
Analysis: This chart provides profit sums at the end of each quarter by category. Because the calculation restarts each year, comparisons by quarter can easily be made. For

Profit
State Sales
The company has been profitable from 2018 to 2020, but progress within recent years has a constant and slightly negative trend. Sales of 2018 began in Quarter 2, therefore total sales and profit are expected to be lower than 2019 and 2020. Select different years to see that profit in 2019 increased by over $30,000, but profit in 2020 decreased by over $100,000. We should look for areas to improve for next year.
